### **Sunboard 1/2" x 3/4" Silver Pex Panel**

#### **Premium Quality & UNIQUE Design Sunboard panel – 1/2" Pex Panel** ( Thickness – 3/4" )

3/4" x 2 ft x 4 ft - Combi Board

3/4" x 2 ft x 4 ft - Blank

- **3/4" Thick - designed for 1/2" Pex pipe, Aluminum & Paper coated Layers**
- **Single Combi Board - 2ft x 4ft, allows straight runs, 180 & 90 deg. turns!**
- Grooves are specially machined so Tubing is **SNAPPED into groove and STAY!**
  - It is NOT a straight channel, where tube is being deflected to OBLONG shape
  - NO tube pop-ups, NO Silicone to hold tube in place
- High-Quality **Furniture Grade Plywood board**
  - Water resistant, approved for Indoor application
- Product is manufactured locally – Encouraging OUR economy!
- Board is coated with PAPER – **Total Silent Operation!**
  - No need to buy and install Rosin paper on top of the boards
  - VISIBLE pipe when installing Hardwood Planks – Avoid Installation Damages!
  - No Expansion/Contraction Noise
  - Contact between hardwood planks and floor panels – Makes NO NOISE!
- Sunboard products are laminated with **0.07" Aluminum layer and Sunpaper all the way thru the channels.** The Sunpaper replaces the rosin

paper when installed with hardwood floor. This avoids the noise created when Pex tubing expands and contracts, as well as eliminating noise created between the Sunboard and the hardwood floors

- Sunboard Pex panel tubing - 8" on-centers
